

YOUR CUSTOMERS ARE STEPPING UP THEIR GAME.

Help them reach new heights with **KARGO MASTER**

Today's world is moving faster than ever. You work hard to help your customers operate productively and efficiently, giving them a leg up on their competition. Team up with Kargo Master for a winning strategy.

BUILT TO WORK.

Our simple rack installation process saves you time, and our technical support team is at your disposal. And once the job is done, you know your customers' vehicles will work as hard as they do.

BETTER THAN EVER.

We're big on trust at Kargo Master, and we don't take your confidence for granted. We've improved the engineering and testing of our aluminum and steel ladder racks, investing heavily in our facilities, systems, and SAE & ASTM compliant manufacturing processes.

OUR DROP DOWN LADDER RACKS ARE A RUNG ABOVE THE REST.

Kargo Master racks are designed to safely increase work productivity and decrease time spent on job prep. Here's how our dropdown racks stack up against the competition:

	Kargo Master	Others	
Available in both aluminum and steel for commercial applications: <ul style="list-style-type: none"> • Crossbar Racks • Clamp & Lock Ladder Racks • Drop Down Ladder Racks • Cargo Racks 	Accommodates all standard ladder types.	✓	X
	Little to no adjustment required.	✓	X
	Minimal moving parts for maintenance-free operation.	✓	X
	Step ladder bracket add-on doesn't require expensive third crossbow.	✓	X
	Lower profile when stowed.	✓	X
	Lower profile during actuation.	✓	X
	Available in steel and HD aluminum.	✓	X
	Installation time	30-45 min	120 min+

KARGO MASTER

IMPROVEMENTS THAT RAISE THE BAR.

We believe in simple designs that simply work. After putting every rack through a comprehensive design and engineering review, we made user-requested enhancements including larger ladder pads and improved operational mechanics.

We also implemented manufacturing best practices to improve quality, reliability, and longevity :

Enhanced our production processes.	Increased the level of spray automation.	Refined our coating coverage tolerances.
<ul style="list-style-type: none"> • Machine deburring removes sharp edges, eliminating the most common failure point of paint finishes. • Sandblasting all aluminum and steel prior to painting creates a more adhesive paintable surface. 	<ul style="list-style-type: none"> • All-new powder coating line features a mix of fully automatic and manual spray guns that improves application consistency. • Fully-enclosed, two stage poly-coating primer process prevents foreign material contamination. 	<ul style="list-style-type: none"> • Calibrated measurement device inspects every production batch for proper coating thickness.
Implemented extensive and continuous testing.	Teamed up with PPG for third-party audits.	Upped the ante with SAE J2334 testing.
<ul style="list-style-type: none"> • Rigorous series of ASTM-compliant assessments ensures longevity of finishes, backed by a three-year warranty. • Every production run undergoes more than 1,000 hours of salt spray testing, extensive adhesive testing, and impact evaluation. 	<ul style="list-style-type: none"> • PPG, an undisputed leader in automotive coatings, performs independent quality audits of Kargo Master manufacturing facilities. 	<ul style="list-style-type: none"> • Successfully passed the rigorous SAE J2334 standards, a cyclic corrosion test that subjects rack finishes to five years of simulated outdoor exposure in a high-stress environment.

LET'S GET TO WORK.
