

CARGO VAN PARTITIONS

Perforated & Solid Partitions

Perforated steel partitions provide the safety and security while allowing view of the cargo area from the cab. This is our most common partition. These partitions are designed to fit with optional door locking kits (full-sized vans only). Improve climate control efficiency and reduce noise with our solid wall partitions. With complete coverage, these partitions offer the most sound damping and visual security.

- 18-gauge steel hemmed and embossed to provide extra strength, security and reduce noise.
- Corner contoured to prevent reaching in from the cab to unlock side door.
- Optional tight compression center panel door latch handle and lock kit for full-sized vans (#40620).
- Quick and easy installation.
- Matte powder coating minimizes glare and resists scratches and chipping.
- Multiple partition attachment points & rubber cushioned door frame prevents noise.
- Kargo Master lifetime warranty.
- Will not fade or dull.

Wire Partitions

For compact vans only, wire partitions offer the most visibility of any partition. Made from 7-gauge wire mesh, these partitions are light weight and easy to install.

- Quick and easy installation
- Allows seats to be pushed completely back and still recline for driver comfort.
- Lightweight (only 45 lbs.).
- Heavy duty construction provides a strong barrier with a quiet ride.
- Gray powder coat finish.

40644 & 40654 POLYCARBONATE SEE THROUGH PANELS

Keep your cab cool (or warm) with these clear panels which still allow you to see out of the rear of your van.

40620 PARTITION LOCK & LATCH KIT

The Partition Lock and Latch Kit includes a locking T-handle on the cab side and a sturdy locking bar on the cargo side. It can be installed on any Kargo Master steel partition with a pass-through door.
